

EVENT COMPLETION REPORT

Seminar: AI in Healthcare

Date: 01 May 2025

Time: 10:00 AM to 11:00 AM

Venue: VIPS Campus

Organised by: Venkateshwar Institute of Paramedical Sciences

1. Introduction

In the era of rapid technological transformation, Artificial Intelligence (AI) has emerged as one of the most promising innovations revolutionizing the healthcare sector. AI is increasingly being used in diagnostics, treatment planning, patient monitoring, laboratory automation, hospital management, and predictive healthcare analytics. Recognizing the growing importance of this transformative technology, Venkateshwar Institute of Paramedical Sciences (VIPS) organized an insightful Seminar on AI in Healthcare on 1st May 2025 at the VIPS Campus.

The seminar was designed to introduce students to the concept of AI and its practical applications in modern healthcare systems. As future healthcare professionals, paramedical students need to stay informed about emerging technologies that are reshaping the delivery of healthcare services worldwide. The programme aimed to broaden students' perspectives, encourage technological adaptability, and prepare them for future professional environments where AI-driven tools and systems will play a significant role.

The session also emphasized the importance of balancing technological advancement with ethical responsibility, patient safety, and human compassion. Through this initiative, the institute reaffirmed its commitment to providing forward-looking education that integrates academic knowledge with industry trends and innovation.

2. Objectives

- To introduce students to the concept and significance of Artificial Intelligence in healthcare.
- To create awareness about AI applications in diagnostics, treatment, and patient care.
- To familiarize students with emerging healthcare technologies and digital transformation.
- To highlight the role of paramedical professionals in AI-enabled healthcare systems.
- To encourage students to adapt to technological advancements for career growth.
- To promote innovation, research orientation, and future readiness among students.

3. Event Highlights

- The seminar commenced at 10:00 AM with a welcome address emphasizing the importance of AI in healthcare.
- Mrs. Nikita Pahuja conducted the session and delivered an engaging lecture on the evolving role of AI in medical sciences.
- Key topics discussed during the seminar included:
 - AI in medical imaging and radiology
 - AI-assisted diagnostics and disease prediction
 - Laboratory automation and smart pathology systems
 - Predictive analytics in patient care
 - Remote monitoring and wearable health technologies
 - AI in hospital administration and workflow management
- The speaker highlighted the benefits of AI in improving:
 - Diagnostic accuracy
 - Operational efficiency
 - Timely interventions
 - Better patient outcomes
- Ethical considerations such as data privacy, accountability, and the human element in care were also discussed.
- The seminar was highly interactive, with students actively participating through questions and discussions.
- The session concluded with a vote of thanks at 10:45 AM.

4. Outcomes

The seminar created significant awareness among students regarding the transformative role of Artificial Intelligence in healthcare. Participants gained a foundational understanding of how AI technologies are being used to improve diagnostics, streamline hospital operations, enhance treatment planning, and support patient monitoring systems.

Students developed a broader perspective on the future of healthcare professions and recognized the need to continuously upgrade their skills in line with technological advancements. The session also generated enthusiasm for innovation, digital literacy, and research opportunities in healthcare technology.

For paramedical students, the programme was particularly valuable in understanding how their future roles may evolve within AI-assisted healthcare environments. It also emphasized that while technology

can improve efficiency, the importance of empathy, ethical responsibility, and patient-centered care remains paramount.

Overall, the seminar enhanced students' career awareness, technological readiness, and confidence in adapting to the future demands of the healthcare industry.

5. Conclusion

The Seminar on AI in Healthcare organized by Venkateshwar Institute of Paramedical Sciences was highly informative, relevant, and future-oriented. The programme successfully introduced students to the growing significance of Artificial Intelligence and its practical applications across multiple domains of healthcare.

The session helped students understand that AI is not a replacement for healthcare professionals, but a powerful tool that can assist in delivering faster, safer, and more efficient healthcare services. It reinforced the importance of combining technological competence with clinical knowledge, compassion, and ethical values.

Such initiatives are essential in preparing students for the rapidly evolving healthcare landscape and ensuring they remain competitive, competent, and confident professionals. The seminar also reflected the institute's commitment to innovation-driven education and holistic student development.

VIPS looks forward to organizing more such programmes that bridge the gap between academics and emerging industry trends, empowering students to become leaders in modern healthcare systems.

6. Acknowledgements

We express our sincere gratitude to:

- Mrs. Nikita Pahuja for delivering an informative and engaging session.
- The management of Venkateshwar Institute of Paramedical Sciences for their continuous support.
- Faculty members for their coordination and guidance.
- Students for their active participation and enthusiasm.
- Support staff for ensuring the smooth conduct of the seminar.

DATE-28/4/2025

CIRCULAR

This is to inform to all the students and the staff that a short session on AI in health care will be held at college on 1/5/2025. All the students are requested to participate in the session. The seminar will be held from 10:00 am till 11:00 am. Students are requested to report at venue by 9:30 am sharply to ensure smooth functioning of the event.
