

EVENT COMPLETION REPORT

**Industry Visit – Water Purification
Plant, Pichola**

Date: 25th April 2025

Time: 11:00 AM onwards

Venue: Water Purification Plant, Pichola, Udaipur

Organised by: Venkateshwar College of Nursing, Umarda, Udaipur

1. Introduction

As a part of its practical and interdisciplinary learning approach, Venkateshwar College of Nursing organized an industry visit to the Water Purification Plant, Pichola, on 25th April 2025. The visit aimed to provide students with hands-on exposure to public health infrastructure and the water treatment processes vital to community health and disease prevention.

This field-based learning initiative was aligned with the curriculum objectives of environmental and community health nursing, reinforcing the connection between safe water practices and public health outcomes.

2. Objectives

- To familiarize students with the operational procedures of a municipal water purification plant
- To understand the health implications of water quality on community well-being
- To observe preventive measures and hygiene protocols used in water treatment
- To bridge theoretical knowledge with field-based learning in environmental health nursing

3. Event Highlights

- Upon arrival, the students were welcomed by the plant supervisor and the technical team, who provided a structured orientation to the layout, workflow, and objectives of the facility.
- The guided tour covered:
 - Intake and sedimentation units
 - Filtration and chlorination processes
 - Water quality testing laboratories
 - Sludge management and disposal systems
 - Safety and hygiene measures adopted by staff
- The technical experts explained the role of physical, chemical, and biological processes in purifying drinking water and how quality parameters are maintained as per public health standards.
- Students were encouraged to ask questions and actively participated in a knowledge-sharing session on the prevention of waterborne diseases, community education, and sanitation practices.

4. Outcomes

- Exposure to a real-time public utility setup enhanced the students' understanding of clean water access as a key determinant of public health
- Students gained practical insight into environmental health, infection prevention, and waterborne disease control
- Reinforced the nurse's role in community awareness and education about safe drinking water and hygiene practices

- Encouraged critical thinking and experiential learning beyond the classroom

5. Conclusion

The industry visit to the Water Purification Plant at Pichola proved to be a highly educational experience for the 67 nursing students from Venkateshwar College of Nursing. It underscored the vital connection between infrastructure, environment, and health, and complemented the institute's mission of delivering comprehensive, community-centric nursing education.
